

St. Augustine High School

Social Studies Department

Dear Parent:

I will be your child's Geography teacher. I bring to St. Augustine many years of teaching experience in public education. I am certified by the Texas Education Agency to teach Geography. I have up-to-date professional teaching hours for Advanced Placement and Gifted and Talented students in Geography.

My goal is to provide the best academic instruction possible, broaden the student's knowledge of globalization, compare the different world cultures, and integrate technology into the Geography curriculum. This course will incorporate the Six Essential Elements and the Eighteen Geography Standards along with the five themes of geography.

Your child will be able to ask and answer geographic questions, as well as acquire, organize, and analyze geographic information.

Students will be expected to be on time, exhibit their best behavior, be on task at all times, and be role models for others. We will have a prayer before the beginning of each class.

Parent conferences are welcomed. Please call (956) 724-8131 to make arrangements.

Sincerely,

Roberto Mora
